How to Use This Book

Each kind of puzzle teaches one way of thinking. Here's what's inside and why it matters:

Prompt Paths

You're directing now. Pick the path. Commit.

Loop It

Patterns of patterns. The world of programming in one puzzle.

Mirror Functions

Compose functions. Mirror, rotate, reflect. You're building.

Decision Trees

A decision tree with consequences. Choose well.

Accumulators

Accumulate, check, accumulate, check. That's an algorithm.

Count the Tokens

Tokens, items, steps. Counting is everywhere.

Find the Keywords

All the words you've learned. Find them. You're ready.

Use a soft pencil so mistakes are easy to fix. Have fun!
